Subject: Participation in EPA Host Exhibitor Session

Dear Tala,

We met several times, SETAC and more recently in December at a meeting with the ACC TSCA Consortium on chemical categories for lung toxicants.

I work with the scientific consulting firm ToxStrategies. We are having an Host Exhibitor session at the SOT meeting March 12th from 9-10.

TSCA Reform: Use of New Tools and Technology for Prioritization and Chemical Risk Evaluation: Presented by ToxStrategies, Inc.

This session will provide an overview of chemical prioritization and risk evaluations under TSCA as amended by the Lautenberg Chemical Safety Act. It will focus on new analytical tools, technologies, and databases that can be used for prioritization and testing of new chemicals and for risk evaluation of existing chemicals.

We would like to see if you would be available to give a 10 min overview of TSCA- New chemicals, prioritization and risk evaluation process under way.

Other speakers in this section will be:

John Wambaugh (EPA) introducing all the available exposure models EPA is considering.

Caroline Ring (ToxStrategies) presenting an overview of an exposure-hazard model she published on that incorporates IVIVE.

Daniele Wikoff (ToxStrategies) presenting the role of systematic review and its place in the risk evaluation process.

Please note:

EPA is having a session (host exhibitor) on Wed- which we were told would focus on the status of the Alternative testing framework.

US EPA's Toxic Substance Control Act—Strategy for Alternative Test Methods to Reduce Animal Testing:
Presented by US EPA
(no description online).

We originally asked Nancy Beck if she could provide an intro since we knew Nancy was going to SOT but she was unsure she could get it approved.

We are hoping that you might be available- not to promote ToxStrategies, but just to highlight EPA's TSCA program.

Thank you for considering this request.

Best regards,

Susan
